

266JRH Multivariable Pressure Transmitters Explosion Proof Industrial Digital Pressure Sensor

Basic Information

- Brand Name: ABB
- Model Number: 266JRH

Product Specification

- Customized Support: OEM
- Mounting Bracket: 316 Stainless Steel
- Supply Voltage Effect: 0.005% Span Per Volt
- Output Signal: 4~20mA
- Measurement Range: 0.1...0..100MPA
- Power Supply: 24VDC
- Operating Temperature: 40~85
- Electrical Output Signal: DC 0 ... 10
- Highlight: **266JRH Multivariable Pressure Transmitters, Explosion Proof multivariable pressure transmitters, abb digital pressure sensor**

Product Description

Multivariable transmitter 266JRH

The multivariable transmitter 266JRH with remote diaphragm seals is able, thanks to multisensor technology, to measure differential pressure, absolute pressure and temperature of liquid, vapour and gas. Temperature is measured via an external RTD.

Overview

In addition to high precision, the multivariable 266 also offers the advantage that only a single device needs to be used for the measuring point instead of several transmitters which reduces purchase and installation cost and increases reliability due to fewer devices and less wiring.

Data

Base accuracy: $\pm 0.075\%$

Reduced process penetrations save money and reduce the risk of leakage

High static working pressure option (41 MPa, 6000 psi) for power plants, pipelines or oil and gas production

Local operation with LCD with TTG (Through The Glass) technology without the need of opening the housing

Exchangeable electronics with automatic configuration capability

Flexible process connections and high selection of corrosion resistant material due to all welded diaphragm seals
