

## Seal line for 266 pressure transmitters S26

### Basic Information

- Brand Name: ABB
- Model Number: Seal line

### Product Specification

- Customized Support: OEM
- Mounting Bracket: 316 Stainless Steel
- Supply Voltage Effect: 0.005% Span Per Volt
- Output Signal: 4~20mA
- Measurement Range: 0.1...0..100MPA
- Power Supply: 24VDC
- Operating Temperature: 40~85
- Electrical Output Signal: DC 0 ... 10
- Highlight: oem abb pressure transmitter,  
20ma abb pressure transmitter,  
oem absolute pressure transmitter

## Product Description

S26 line, together with 266 pressure transmitter family represents high reliability combining the exceptional features of the 266 series for gauge, absolute and differential pressure measurement. S26 line allows optimum design for each application without compromising transmitters' performances.

### Overview

Thanks to the proven Taylor's "All-Welded" technology, ABB is the best choice for remote seals. The S26 line includes a wide choice of process connections that allows the user to always pick the right one for his installation requirements.

The innovative wetted materials open new frontiers to enhance existing measurement life and implement new demanding applications with trust. Moreover, we offer special designed remote seals for individual process solutions adding flexibility for the most demanding custom installations.
