

## Laser level transmitters

### Basic Information

- Brand Name: ABB

### Product Specification

## Product Description

ABB is a leading manufacturer of state-of-the-art instruments for level and volume detection of liquids and bulk solids.

The family of non-contact laser volume and level products, LLT100, LM80, and LM200, provide solutions for accurate measurement in the following applications: inventory in bunkers, blending hoppers, reactor vessels, level control, volumetric measurement, and various dry bulk solids and liquids in silos.

These maintenance-free products meet the demands of process automation and inventory management in several industries such as mining, aggregates, oil and gas, chemicals, food and beverages, pharma, water and waste water.
